"A Sincere Message to You to Help Win this War"

More fruit : More Vegetables : More flowers FOR THE HOME NEEDS

Everyone seems anxious to do his part to help win the war—some are at a loss as to how they can help—and others are doing more than their share. During war times, it's our patriotic duty, yours and mine, to co-operate to help garden our way to Victory, for in no other way can most of us be of greater service to our country.

Dark days are ahead—curtailment of every day needs will change the living habits of our people. They will be forced to spend more time at home—develop new hobbies—and learn that the garden plays an important part in the winning of the war. Let's not fail in our duty to make the VICTORY GARDEN CAMPAIGN a great success.

The wise gardener realizes that Espalier Dwarf Trained fruit trees take up very little space—produce a plentiful crop of fruit—are decorative—and inexpensive.

No suburban home grounds, whether large or small, should be without fruit trees, the product of which may contribute greatly to healthful living and enjoyable meals. Many gardens nowadays can't afford such a luxury as a full sized fruit tree. But almost any garden has room for at least one or more Espaliered fruit trees, for the roots take up practically no space at all. Herbs or flowers may be planted at their very feet since the trees cast no shadows.

The amateur will find that Espaliers are easier to grow and care for than standard fruit trees. And, what's more, the owner will be delighted when he discovers the generous crop of large, superior quality fruit these small trees can produce—especially since the yield is a return on an investment of virtually no "Space" at all and the trees are as ornamental as they are useful.

DON'T PUT IT OFF UNTIL NEXT SPRING. WE STRONGLY URGE YOU TO PLAN AND ACT NOW TO PLANT YOUR VICTORY GARDEN DURING THE MONTHS OF OCTOBER, NOVEMBER, AND DECEMBER, FOR THE REASONS DESCRIBED BELOW:

1. Fall planted trees gain a whole years growth over spring planted trees and they are guaranteed 100% whereas spring planted trees are not.
2. The demand for Dwarf Fruit trees is great. We will surely run short of several forms and varieties this fall.
3. Labor and transportation problems will cause a fruit shortage next year.
4. Prices on dwarf fruit trees will be much higher next spring.
5. Act Now—Take advantage of our present low prices—a choice selection of trees—and our SPECIAL 10% DISCOUNT OFFER allowed on all CASH ORDERS received to OCTOBER 31st. BUY NOW and 'KEEP 'EM GROWING.'

NECTARINES—Boston, Red Roman, Lord Napier, and Newton.

APRICOTS—Early Golden, Moore Head.

(Write for illustrated Catalog)

(SEND US YOUR SPACE MEASUREMENTS. WE WILL GLADLY SOLVE YOUR PROBLEM)

VICTORY FENCE—Of the many interesting patterns which can be made with Victory Trees, the most attractive is the Victory Fence. It consists of a row of Victory Trees, set to give an effect of diagonal lattice work of living green - exquisitely beautiful when covered with blossoms in springtime or richly colored fruit in fall.

The Victory Fence is ideal for outlining a service yard—screening parts of the garden—along driveways or walks—to divide the flower from the vegetable garden—against a garage wall or fence, and many other uses.

Trees in the Victory Fence pattern are planted two feet apart in order to obtain the desired effect. At least 5 Victory Fruit Trees are required to complete the lattice design. This pattern may be extended by adding additional trees. Any garden with a space of 12 feet or more in width affords room for a Victory Fence. Friends will marvel at this union of the beautiful, the practical in gardening, and your patriotism in helping to strengthen morale.

* * *

SUMMER HOUSE—This arbor is 10 feet 3 inches in diameter, set up with seven Espalier Fruit Trees of the Four Armed Palmette Verrier Shape. To obtain immediate effect, the tallest specimen trees are used, priced at \$20.00 each in our catalogue. But, if you prefer to watch the trees gradually making new growth, the smaller size Four Armed Palmette Verrier Espalier trees may be used.

Picture your garden how it would appear planted with this delightful miniature orchard entirely walled and roofed with trained fruit trees. The fruit grow temptingly within arm's reach, some clusters not more than 12 inches from the ground. Inside, a few benches or chairs invite you to rest or entertain.

* * *

PERGOLA—This arbor may be set up in any length desired. For this purpose, either the Four, Six, or Eight Armed Palmette Verrier types of Espalier are used, depending mostly upon the space you intend to cover. Kindly send us your ground measurements and we shall gladly suggest the types of Espaliers best suited to meet your requirements properly.

The designs of the different types of Espaliers are repeated so effectively on either side of this arbor that one finds it very thrilling to walk under this canopied arbor of living green.

* * *

NOTICE—Either apple or pear varieties, or a combination of both varieties are used in forming the Summer House or Pergola. Any variety may be used to obtain the Victory Fence pattern. Complete instructions pertaining to the planting and care of the Victory Fence, Summer House and Pergola are supplied with each order. The amateur will find the directions easy to follow. Please write us for further information or literature.

ESPALIERS—MAKE IDEAL HOLIDAY GIFTS: Surprise your folks and friends with an ideal living gift on Christmas, Easter, Mother's or Father's Day, Weddings, Birthdays, Anniversaries, and other important occasions.

They will enjoy beauty and a crop of large, luscious fruit for many years to come. Just imagine what lasting happiness Espalier fruit trees, trained in many fascinating forms, will bring into their lifetime. Plants are always appropriate and pleasing gifts, because they reflect thought on the part of the giver. "Neither Gift nor Giver Forgotten."

Special Sale of Standard Dwarf Fruit Trees

Grow your own orchard. Enjoy picking a fresh crop of extra large, luscious fruit from your garden every year. Whether you have a small or large area, you can surely plant some Standard Dwarf fruit trees in apple, pear, plum, peach, apricot and nectarine varieties at prices within your budget.

Select and grow the very choicest varieties which are neither to be obtained in the stores or never reach the markets because due to their very fine qualities they cannot be used commercially. Only the home owner can grow these special varieties and let the fruit stay on the trees until they have reached their peak of ripeness and flavor.

Leuthard's Standard Dwarf fruit trees are all hardy trees, carefully chosen and tried for their suitability to this country's soil and climate. Our trees, the best of varieties, have been grown and propagated under the careful supervision of long experienced and skilled men. It will pay you to plant Northern grown fruit trees that have proven most satisfactory to growers throughout the United States because of the extra strength and hardiness our rigorous climate develops in them.

When you buy a LEUTHARD'S tree, you can rest assured you are dealing with a reliable house built through hard work, honesty and fair dealings. You will find our stock strong, heavy roots, true to name, and free from diseases. Our 17 years of progress, satisfied customers and repeated orders is our guarantee you will be delighted with our class of nursery stock.
